Business case in a page

Days back to classrooms, and findings to establishments sooner. A template for inspectorates and education bodies. Complete the table with your own figures and paste the paragraphs into your submission.

Executive summary

1. **The need.** Report writing takes inspectors out of classrooms and delays findings reaching the establishments inspected.
2. **The change.** EDUINSPECT360 drafts each report from the evidence inspectors capture, and inspectors review, edit and approve every section.
3. **The days.** At 1,000 inspections a year, the planning range is 900 to 1,567 inspector days a year redeployed to classrooms.
4. **The speed.** Reports reach establishments 7.2 to 10.8 working days sooner, from a published expectation of 38 working days.[1]
5. **The control.** Judgements stay with inspectors, every AI action is logged, and the next step is a 45-minute briefing and a pilot scoped to your framework.

Cost benefit table (GBP)

> Benefit figures show our planning defaults for 1,000 inspections a year. Replace them with your own figures. Enter your costs from your quote. Calculate your figures at eduinspect360.com/roi.html.

Item	Conservative	Expected	Basis
BENEFITS PER YEAR			
Inspector days redeployed to classrooms	900	1,567	Writing and review time saved
Extra inspections possible, same team	142	247	Days back ÷ inspector days per inspection
Working days sooner to published results	7.2	10.8	Drafting window compressed
Value of inspector time redeployed	307,200	534,333	Days × your day cost
COSTS IN YEAR 1			
Platform subscription			From your quote
Implementation and configuration			From your quote
Training and change support			From your quote
Internal project time			Your estimate
Total costs, year 1	**£0**	**£0**	**Sum of costs**
Net benefit, year 1	**£307,200**	**£534,333**	**Value of time redeployed less total costs**

Only direct inspector report writing and quality assurance time is counted. Travel, overheads, school side time and the value of earlier publication are not included. The value is time redeployed to classroom work, not a staffing reduction.

Strategic need

[Organisation] completes 1,000 inspections a year. Each ends with a written report, and that writing time is inspector time not spent in classrooms. A published expectation in England is to publish reports within 38 working days of the end of an inspection,[1] and research published by the FDA in January 2026 reports that 98% of HM Inspectors work beyond their contracted hours.[2] [Organisation] needs to return inspector time to observation and get findings to establishments sooner, without weakening professional judgement.

Value for money

On planning assumptions that [Organisation] can replace with its own timesheet data, the platform returns 900 to 1,567 inspector days a year to classrooms. That is 142 to 247 extra inspections with the same team, valued at £307,200 to £534,333 a year at a day cost of £335. Only direct report writing and quality assurance time is counted. In England a contracted team inspector day costs £335 and a quality assurance day £392.[3] Costs are set out in the table above.

Delivery

EDUINSPECT360 is configured to [Organisation]'s own inspection framework, grading scale and report structure, so a framework change is a configuration change and not a redevelopment project. Delivery starts with a 45-minute briefing against the framework, followed by a pilot scoped to a defined set of inspections, with benefits measured against [Organisation]'s own baseline.

Assurance

A named inspector reviews and approves every AI drafted section before it affects any outcome, and judgements remain the inspector's. Every AI action is written to an append-only audit log. Data is segregated per client and [Organisation] decides where it is hosted. This matches the human oversight Ofsted publishes for its own use of AI.[4] EDUINSPECT360 is aligned to ISO 27001, SOC 2 Type II, Cyber Essentials Plus and WCAG 2.1 AA.

Sources

1. Ofsted, methodology for state-funded schools inspections and outcomes as at 31 December 2021, GOV.UK: reports are published "within 38 working days of the end of the inspection".
2. FDA, news release on research into HM Inspectors working beyond their contracted hours, 22 January 2026: 98 per cent work beyond their contracted hours.
3. Ofsted, Payments for contracted Ofsted inspectors, GOV.UK, updated 26 June 2025: £335 a day for a team inspector and £392 a day for quality assurance, covering an average of 3 inspection outputs.
4. Ofsted, Ofsted's use of AI, GOV.UK, updated 21 October 2025: meaningful human control of AI processes and appropriate human oversight.

Saving shares are EDUINSPECT360 planning assumptions: conservative 40% of writing time, 30% of review time and 40% of the drafting window, expected 70%, 50% and 60%, reflecting drafting moving from days to hours. Both cases can be replaced with your own pilot data. The full method is at eduinspect360.com/roi.html.
